## About Us

Global Namdhari Engineers was founded by Mr. Bhagwant Singh (Mechanical Engineer) with an aim to introduce hi-tech machines and support in the production of animal feed, biomass pellets and other products. His devotion to contribute fairly in the growth of numerous industries made our engineering company get applause, appreciated and recognition in various parts of the world. We have supportive and skilled engineers with huge industrial knowledge to design, develop and produce Wood Pellet Mill, Counter Cooler, Double Trippel Ribbon Mixer Machine, Poultry and Cattle Feed Mash Plant, Straw Pellet Plant and numerous others. These advanced machines consume less energy, require less maintenance, serve for longer period of time and perform functions flawlessly.

Our journey as a manufacturer of Cattle Feed Machines Spare Parts started in the year 1990. In 1992, we expanded our operations to production of Cattle Feed Plants and then later in the year 1995, we began fabrication of Poultry Feed Plants. In the same year, we started producing Biomass Plants to serve as one stop shop to avail hi-tech plants. Finally in 1996, we installed our very first plant of biomass in Rakhra Village, Punjab (India).

Global Namdhari Engineers is a Ludhiana, Punjab (India) located production and exporting business establishment of Straw Pellet Plant, Cattle Feed Plant, Paddle Mixer Machine, Counter Cooler, and others. These machines and plant are built in standard capacities to meet specific needs of customers. Our engineers and designers keep customers preferences in focus while designing, developing and producing aforesaid machines. For our customers satisfaction, we make commitment of completing orders within the scheduled time and providing authentic information of shipment. All the rules and regulations of the industry are followed while producing products and making deals with customers based across the world.
